Evaluation, sorting and eliminations

The classification of the archives did not proceed to any elimination. A sorting was carried out to remove the blank sheets (mainly stratigraphic unit sheets).

Producer history

The ERC HornEast project (Horn & Crescent. Connections, Mobility and Exchange between the Horn of Africa and the Middle East in the Middle Ages) is a Horizon 2020 research and innovation program of the European Union (as part of the grant agreement no. 726206). Started in 2017 and ending in 2023, the project aims to document the relationships between Christian societies in the Horn of Africa (Ethiopia, Nubia) and their Islamic environment at local and regional scales (Egypt, Palestine, Arabian Peninsula), in order to better understand the modalities of the Islamization process at work in the region during the medieval millennium (7th – 15th century). It is composed of researchers in the humanities and social sciences and hosted by Aix-Marseille University.

Content type

The project archives are mainly from documents produced during archaeological excavation and field prospecting campaigns in 2018 and 2019. There are also several documents produced for scientific events of the project.
